

Diffusers

Jet flow - JFD

Recommended for:

Ceiling, sidewall & ducting

Supply

Overview

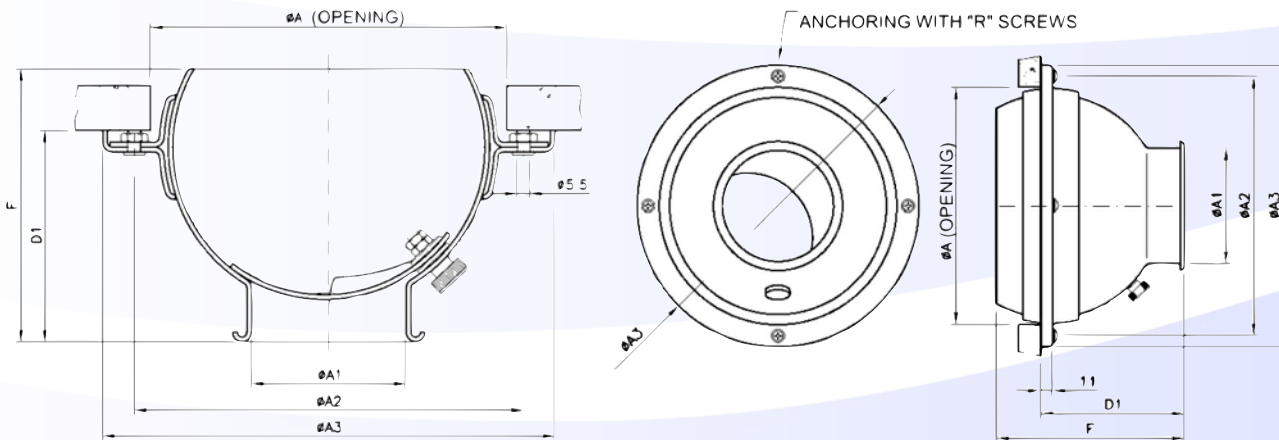

*Brilliant for targeted ventilation
Exceptionally long throw*

Best suited to large open plan areas, jet flow diffusers are much like drum jet diffusers in terms of suitable applications.

Throws of around 30m can be created, making these perfect for warehouses, and the excellent levels of adjustability make Series JFD diffusers extremely capable supply units.

Specifications:

- Materials:** Aluminium throughout.
- Fixings:** Face fixing holes.
- Sizes:** See table overleaf.
- Finish:** Standard - Satin anodised.
Optional - Any RAL colour.
