## Overview

Pressed steel grilles, diffusers and registers are low cost air terminals, most associated with domestic warm air heating systems.

HVC Series PS Pressed steel range encapsulates a variety of pressed steel units, which can be used for their original purpose with warm air heating systems, or in doors as transfer units etc.

## Construction

- Pressed steel construction with manually adjustable blades.
- Series PSFD includes a cog for manual adjustment of rear mounted damper.
- Series PSCD includes a cord operated rear mounted damper.
- Series PSR includes a lever operated rear mounted damper.
